

# VoiceThread (BB Learn)

## What is it?

- VoiceThread is a learning tool for enhancing student engagement and online presence.
- Students and instructors are able to create and share; audio and video files, images, PowerPoint presentations, documents, and PDFs. Comments can be left in these formats as well.

## How to setup a VoiceThread Content Item

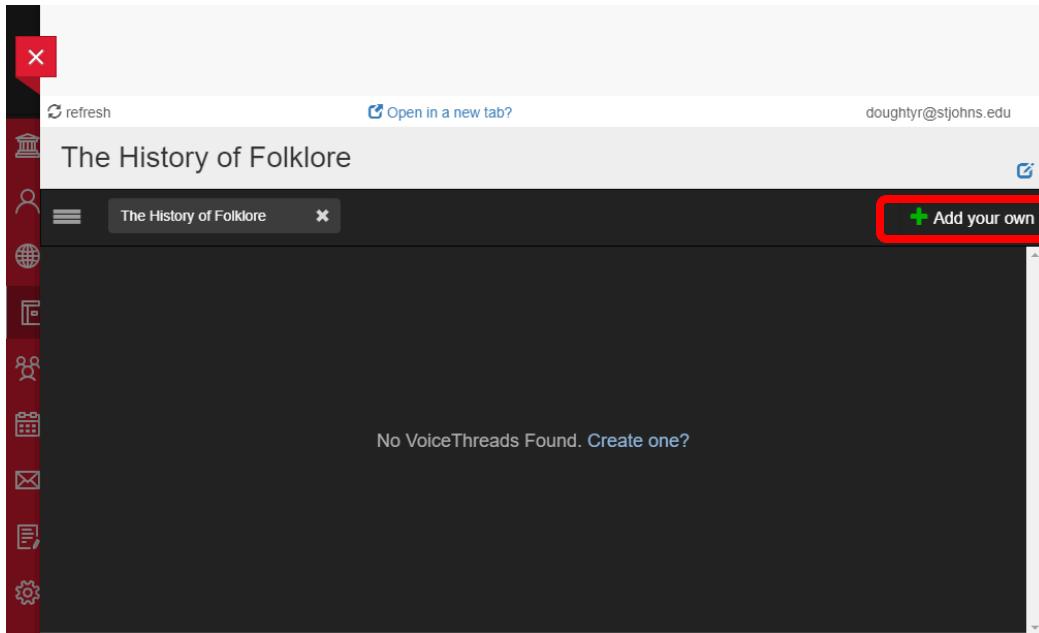

- **Click “VoiceThread”** under the *Mashups Section* in the *Build Content Tab* in the Content Section of Blackboard.

- Fill out the information like you normally would when adding content to your course, you can Enable Evaluation in the *Grading* section if you want.

- **Click “Submit”** after all other options are filled out.

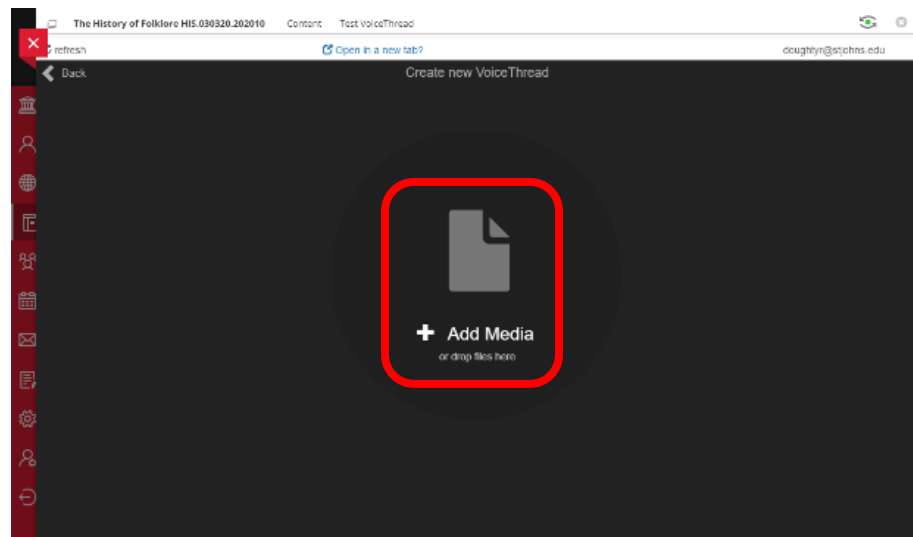

## Creating a VoiceThread Video

- Click the VoiceThread Content Item you created in your course to go to VoiceThread. If it is your first time going to VoiceThread, choose Course View when asked.

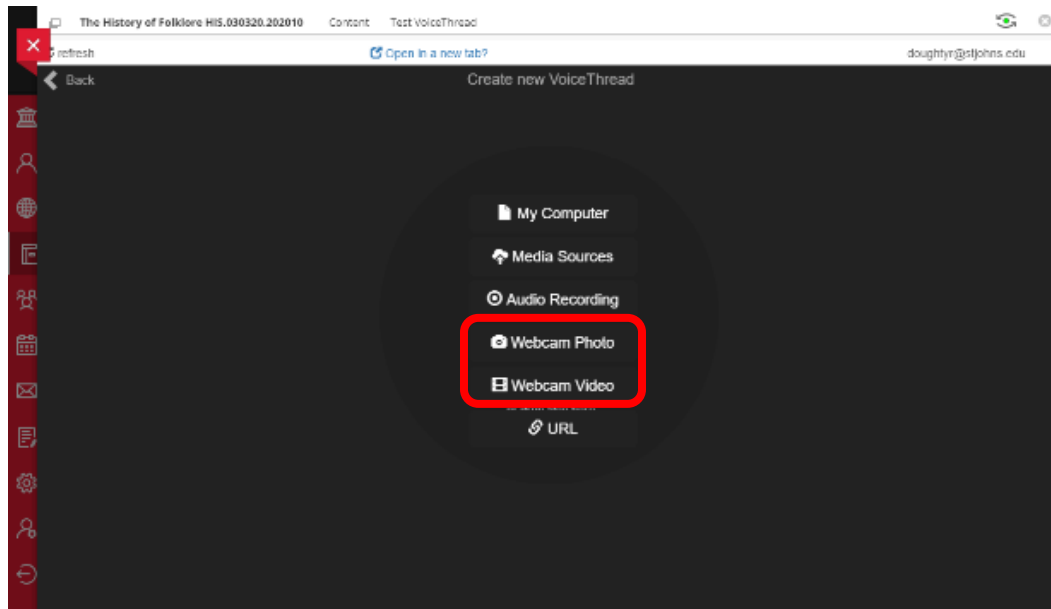

- In the top right corner, **Click** the *Add your own* Button, then **Select “Create a new Voicethread**

- **Click** the *Add Media* icon in the middle of the screen.

- **Click** “*Webcam Photo*” or “*Webcam Video*” to create your own photo or video. Alternatively, if you have a media file you want to use, you can browse for it and use those files.

- After you create/choose your media, you have three options to **Add Media**, **Comment**, or **Share**. You can continue to add Media, Comment on what is there, or finish and share to the groups you are in. (You are automatically put into a group for the course that you opened VoiceThread with)
